Plan for Mobile Application Management

Implement Modern Device Services (30-35%)

Plan for Devices and Apps
• Create and Configure Microsoft Store for Business
• Plan App Deployment
• Plan Device Co-management
• Plan Device Monitoring
• Plan for Device Profiles
• Plan for Mobile Application Management
• Plan Mobile Device Security

==========

Plan for Mobile Application Management

App protection policies (APP) are rules that ensure an organization's data remains safe or contained in a managed app.

A policy can be a rule that is enforced when the user attempts to access or move "corporate" data, or a set of actions that are prohibited or monitored when the user is inside the app.

A managed app is an app that has app protection policies applied to it, and can be managed by Intune.

Prerequisites -

```
1. Azure AD subscription
2. Intune subscription - users need an Intune license assigned
3. O365 subscription - users will need an O365 license assigned
4. Azure AD account - all users must be in Azure AD
5. Supported platforms - Win10, iOS & Android
6. Security Groups - create as needed to assign policies
7. Supported apps - policies can only be applied to apps that support the
